MCGHealth Cardiovascular Center
MCGHealth Cardiovascular Center: Your #1 Referral Choice

- Experienced physicians and surgeons equipped with advanced technology
- Comprehensive, coordinated and team-based inpatient and outpatient care for patients with the full range of cardiovascular conditions
- Your patients will be seen quickly.
- We will submit prompt, thorough reports on our findings and keep you updated on your patient’s progress.

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Benefits to You and Your Patients

- A freestanding, easily accessible outpatient cardiovascular clinic with echo and nuclear diagnostic capabilities plus a vascular lab, patient education area and easy parking

- A team of preventive, diagnostic and interventional cardiologists who treat the full range of cardiovascular diseases

- The area’s only Women’s Heart Health Clinic

- An inpatient coronary care unit, cardiac step-down facility and two cardiac telemetry units

- The area’s first accredited Chest Pain Center to speed the delivery of care to heart attack patients

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.

Meeting All Your Cardiovascular Needs

Diagnostics

The center offers a full range of tests and a fully accredited, digital adult echocardiography lab. Tests include:

- Echocardiograms, including special stress and trans-esophageal echocardiograms in a lab that is accredited by the Intersocietal Commission for Accreditation of Echocardiology Laboratories (ICAEL).
- Stress and nuclear stress tests
- Electrocardiograms
- Doppler (Venous and Carotid)
- Holter Monitors
- Event and loop recorders
- Vascular Angiography
- Ankle Brachial Index (ABI) for PVD
- Vascular Ultrasound
- Microvascular circulation test to determine how much oxygen is reaching tissue and help determine care plans for PVD patients
- A 64-slice CT Scanner

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

General Cardiology

Our general cardiology services include complete cardiovascular diagnosis, management and care, from prevention to early detection to treatment. Common diagnoses include:

- Angina
- Atherosclerosis
- Cardiomyopathy
- Congenital heart disease
- Coronary artery disease (CAD)
- Heart failure
- Hypertension
- Pregnancy and heart disease

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs
Digital Cardiac Catheterization Lab

The lab offers the latest catheter-based devices. It consists of two catheterization suites, one equipped with digital high-resolution cineless technology for prompt delivery of high quality images. Services include:

- 24/7 emergency coverage
- Balloon angioplasty
- Coronary stent implantation
- Coronary artherectomy
- Rotoblation, in which a tip bores into a blockage creating tiny debris that is cleared from the blood as waste
- AngioJet therapy to dissolve blood clots in coronary arteries before balloon angioplasty or to reopen coronary bypass grafts or clogged stents
- Diagnostics and interventions for carotid artery disease and peripheral vascular disease (PVD) in the kidneys and legs

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

Electrophysiology

Skilled electrophysiologists perform complex procedures on adults and children not available at other area hospitals, including ablation procedures for atrial fibrillation, ventricular tachycardia and other conditions. Services include:

- Conventional and advanced electrophysiology studies, including three-dimensional electroanatomical mapping
- Tilt table testing to diagnose and help manage syncope
- Licensed technicians
- Medications
- Pacemakers, implantable cardiodefibrillators (ICDs) and biventricular device management
- Lead extraction
- Radiofrequency catheter ablation
- Cryoablation
- Second opinions for arrhythmia and implanted device management
- Coordination of genetic testing for hereditary arrhythmia syndromes

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.

mcghealth.org/cardio
Meeting All Your Cardiovascular Needs

Nuclear Cardiology

MCGHealth Cardiovascular Center offers state-of-the-art nuclear stress tests and physicians specially trained to interpret these tests. We also offer a small nuclear camera that is well tolerated by patients with claustrophobia, a reclining chair for use during imaging rather than the flat table most labs use, and the following tests:

- Myocardial perfusion scan
- Multiple Gated Acquisition Scan (MUGA)
- Myocardial Viability Study

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

Carotid Artery Disease

MCGHealth’s Stroke Program brings together expertise from the Emergency Department, Neuroscience Center, Cardiopulmonary Center, Radiation, Surgery as well as specially trained nurses, therapists and registered dieticians. The program focuses on prevention, acute care management and secondary stroke prevention and offers the most advanced diagnostics and therapies, including:

- A full range of diagnostic tests: Doppler, carotid artery duplex scans, and a 64-slice CT Scanner
- Physicians who specialize in carotid artery disease and vascular surgery
- Access to all the physicians and resources of MCGHealth’s Neuroscience Center of Excellence
- Carotid endocardectomy
- Newer minimally invasive Carotid Artery Angioplasty with Stenting (CAS)
- Embolic Prevention Devices. Inserted during CAS, these tiny devices catch any clots or small debris that might break loose during angioplasty.
- Physical, occupational and speech therapy

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.

Meeting All Your Cardiovascular Needs
Heart Failure

The Center offers comprehensive care for heart failure by cardiologists who specialize in this disorder. Services include:

• Medications and medical management
• Heart failure education
• Investigational drugs and devices
• Cardiac catheterization
• Electrophysiology services, including biventricular pacemakers
• A state-of-the-art Cardiac Rehabilitation Center
• Cardiac surgery

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

Peripheral Vascular Disease (PVD)

Leg pain after walking is not just a symptom of aging. It can indicate peripheral vascular disease, and possibly heart disease. Our medical staff includes cardiologists and surgeons who specialize in PVD and offer advanced diagnostic and treatment options including:

• Ankle Brachial Index (ABI) test
• A 64-slice CT scanner
• Diagnostics and interventions for PVD in the legs, arms and kidneys, including angioplasty and stents
• Microvascular Circulation Test to determine how much oxygen is reaching tissue and help determine a treatment plan
• Bypass surgery
• The latest artherectomy therapies to avoid stents or surgeries

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

Cardiothoracic Surgery

Our team of highly specialized cardiothoracic and vascular surgeons perform a complete range of cardiovascular surgeries, including:

- Mitral valve replacement and repair
- Coronary artery bypass, including “off pump” beating heart surgery
- Repair of congenital heart defects
- Mechanical assist device placement
- Surgery for aortic aneurysms
- Endocardectomy to clear carotid arteries
- Bypass surgeries for peripheral vascular disease

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.

mcghealth.org/cardio
Meeting All Your Cardiovascular Needs

Vascular Surgery

Common surgeries performed by Vascular Surgery include:

- Endovascular repair of abdominal aortic aneurysms
- Endovascular repair of peripheral arterial aneurysms
- Endocardectomy and stenting for carotid artery stenosis
- Peripheral vascular angioplasty and stenting
- Minimally invasive treatment of venous disease
- Intravascular ultrasound

To refer an adult heart patient, call 706-721-2426 or FAX 706-721-1459.
Meeting All Your Cardiovascular Needs

Cardiac Rehabilitation Program

MCGHealth’s Cardiac Rehabilitation Center offers the safety, security and equipment your patients need to speed their recovery. Common reasons for referral to cardiac rehab include CABG, MI within the past year, post PTCA, post stent, heart transplant, stable angina, valve repair or replacement. The Center offers:

- A board-certified physician who works directly in the Center. No other area cardiac rehab center has a dedicated on-site physician.
- An exercise physiologist who will design individual exercise plans for your patients
- A registered nurse specializing in cardiac care who will monitor your patients’ heart as they exercise
- Advanced exercise equipment and an indoor walking track
- Classes on smoking cessation, stress management, heart-healthy eating and blood pressure, cholesterol and diabetes control
- Monthly updates to referring physicians
- A convenient location on the MCG campus, with free street-level parking right outside the building

To refer a patient to The Cardiac Rehabilitation Program, please call 706-721-9055.

mcghealth.org/cardio
Pediatric Cardiology Through MCGHealth Children’s Medical Center

- A team of Pediatric Cardiologists and a Pediatric Cardiothoracic Surgeon
- Comprehensive in-house diagnostics and the region’s only dedicated Pediatric Hybrid Cardiac Catheterization Suite
- An inpatient pediatric intensive care unit (PICU) with wireless telemetry monitoring
- An inpatient pediatric heart unit for patients who do not require intensive care
- The region’s only Extracorporeal Membrane Oxygenation (ECMO) technology and specialists to keep the hearts and lungs of critically ill children working for up to two weeks during healing
- Arrhythmia evaluation and management
- Pacemaker management
- Pediatric Cardiothoracic Surgery and Pediatric Anesthesiologists
- Registered dieticians, medical social workers and respiratory therapists
- Consultative fetal cardiology services
- Child Life Specialists to help children understand and cope with care

To schedule an appointment with a pediatric cardiologist, please call 706-721-8522 or FAX 706-721-1459.
Physicians

Gautam Agarwal, MD
Clinical Interests:
Endovascular Repair of Aneurysms, Endocardectomy and Stenting for Carotid Artery Stenosis, Peripheral Vascular Angioplasty and Stenting

Vishal Arora, MD
Clinical Interests:
Endovascular Treatment of Peripheral Vascular Disease, Vascular Surgery

Adam Berman, MD
Clinical Interests:
Electrophysiology, Ablation of Cardiac Arrhythmias

Mindy Gentry, MD
Clinical Interests:
Cardiovascular Disease in Women
Physicians

Deepak Kapoor, MD

Clinical Interests:
Interventional Cardiology, Coronary Artery Disease

Christopher Pallas, MD

Clinical Interests:
Diagnostic Invasive Cardiology, Interventional Cardiology, Echocardiography, Critical Care Cardiology

Vijay Patel, MD

Clinical Interests:
Adult Cardiac Surgery, Cardiac Assist Devices

L. Michael Prisant, MD

Clinical Interests:
Hypertension, Lipid Disorders, Heart

Physicians

Vincent Robinson, MD
Clinical Interests:
Nuclear Cardiology, Atherosclerotic Vascular Disease

Gyanendra Sharma, MD
Clinical Interests:
Valvular Heart Disease, MRI, Pulmonary Embolism, Preoperative Cardiac Risk Assessment, 3-D Echocardiography, Anticoagulation Management

Robert Sorrentino, MD
Clinical Interests:
Electrophysiology, Management of Complex Arrhythmia and Devices

John Thornton, MD
Clinical Interests:
Heart Failure, Acute Coronary Syndromes, Sudden Cardiac Death
