Center for Patient- and Family-Centered Care
Family Faculty 2008
The Starfish

One morning while walking along a beach, a man saw someone in the distance leaning down, picking something up, and throwing it into the ocean.

As he came closer, he saw thousands of starfish thrown onto the beach by the tide. Unable to return to the ocean, the starfish were dying.

He observed a young man picking up the starfish, one by one, and throwing them back into the water.

After watching the seemingly futile effort, the observer said, “There must be thousands of starfish on this beach. It would be impossible for you to get to all of them. There are simply too many. You can’t possibly save enough to make a difference.”

The young man smiled as he continued to pick up another starfish and toss it back into the ocean. He replied...

“I made a difference to that one.”

*It is the goal of the MCGHealth Family Faculty to make a difference, one by one, in the thoughts, practices, and methods of current and future health care professionals working with our families.*
Instructor Guidelines

Purpose of the Family Faculty

The goal of the Family Faculty is to strengthen the partnership between health care professionals, patients and families by providing students and health care professionals with the opportunity to learn about issues related to the care of patients with chronic illnesses, disabilities and health care challenges.

The Directory of Families provides information about families with chronic illnesses or disabilities who are willing to share their experiences, expertise and perspectives with students and health care professionals at the Medical College of Georgia.

Ways in Which Family Faculty Members May Participate

Family Faculty members understand their participation may vary widely from one class to another. For example, one member may talk with the instructor about a topic and not speak in front of a class, another member might participate in a panel discussion and others may be the sole speaker.

Further information about a Family Faculty member may be obtained before deciding whether or not the member might assist with teaching a particular class. Family Faculty members are free to choose if they want to accept an invitation to participate. Also, the Family Faculty member will work with the instructor to determine the level of participation.

Steps for Instructors to Access Family Faculty

1. Instructors should contact a member directly. The name, e-mail address and phone number of each member are listed on the individual’s information page.

2. Provide members with detailed directions and parking information as well as a phone number to call if last minute problems arise.

3. Notify the Family Services Development as soon as arrangements have been made with a family. The office number is 721-4790 or e-mail aroberson@mcg.edu.

4. Instructors, students and Family Faculty members must complete an evaluation form at the end of class. Evaluations are located in the back of this directory and can be copied as needed.

5. Inform members in advance if you intend to record the class session. Members must agree to be taped and sign a photo consent form. A photo consent form is located in the back of this directory and can be copied as needed.

6. Information about the Family Faculty member is confidential and should be used for the purpose intended. Family information in the directory is not to be copied or distributed without the written permission of the member or members involved.
Preparing Families and Students for Class Participation

1. The instructor is to provide information about the objectives of the presentation and relevant information about the composition of the class. Information about the “personality” of the class and what types of classroom responses might be anticipated would also be helpful.

2. It is also the instructor’s responsibility to prepare the students for the participation of the family member. Pertinent information about the family, an overview of the objectives and format of the class should be presented.

3. Family Faculty participating in the presentation may choose whether or not to respond to questions of a personal nature.

4. It is important that the instructor talk with Family Faculty members after the presentation to address any questions, concerns or suggestions about their participation.

Evaluation of Program

Instructors will be asked to complete a program evaluation survey for each family participating in the course or program. For each Family Faculty presentation or discussion, students will be asked to complete an evaluation at the end of the class. Likewise, Family Faculty members will complete an evaluation after participating in a course or program.

Families are encouraged to bring evaluation forms with them to presentations.

All evaluation forms are to be returned to:

Bernard Roberson, Director
Family Services Development
MCGHealth Children’s Medical Center
1446 Harper Street, BT 1964
Augusta, GA 30912
Fax: 721-5196

Please return evaluation forms within a week following the presentation.
More Information about the Family Faculty Program

For additional information about the Family Faculty Program, contact Bernard Roberson at 721-4790 or aroberson@mcg.edu.

Your suggestions and input are welcome in an effort to improve the use and success of this program.

Members of the Family Faculty Steering Committee

We extend our appreciation to the family members who participated in the development of the Family Faculty Program.
Nettie Engels, Patient Advisor
Mollee Atkinson, Speech Therapist
Renee Collins, Parent Educator
Geneice McCoy, Governor’s Council on Disability
Bernard Roberson, Director – MCGHealth Family Services Development
Dr. Roman Cibirka, Associate Vice President, Academic Affairs, Medical College of Georgia
Pat Sodomka, Director, Center for Patient- and Family-Centered Care

After each presentation, Family Faculty receive a modest $25 stipend to help offset expenses associated with their involvement. We welcome donations from your department or school to help with programmatic expenses.

Acknowledgement:

Special thanks to Vanderbilt Children’s Hospital for sharing information about their FACTs Program (Families As Classroom Teachers). Portions of the FACTs Program have been adopted with permission.

Personal Story: My initial diagnosis took me one hour on the internet (including identifying the appropriate treatment), it took four months further before the docs agreed with me and started treatment. All appropriate supportive treatment only occurred at my request – never the doc's suggestions or referral – e.g. physical therapy, behavioral support, etc.

Mollee Atkinson

Home: (706) 860-7589
Email: ggmmollee@comcast.net

Personal Story: At the age of seven, my daughter, Amee, was diagnosed in 1985 with a brain tumor. At the time her brothers were four years and eight weeks old. Amee had surgery followed with radiation and chemotherapy over a period of two years. In 1988, she was hit in the head with a golf ball and had surgery again for a Ventricular Pulmonary shunt. The shunt lasted until 2002 when it malfunctioned and had to be replaced. Amee is mildly mentally handicapped due to surgeries and radiation. She has no pituitary function and receives replacement hormones. Amee has some mild weakness on her right side and is dependent on us, her parents, both medically and socially.

Diagnosis:
• Medulloblastom Brain Tumor
• Brain Injury (hit in head by golf ball)
• Mild mental disability (due to surgery and radiation)
• No Pituitary function

Areas of Interest:
• Long term illness.
• Receiving “bad news”
• Treating the whole family, not just the child.
• The importance of family members being part of the treatment team.

Medical Care/Services:
• Pediatric/Adult Endocrinology
• Pediatric Radiation
• Pediatric Chemotherapy
• Pediatric/Adult Neurosurgery
• Plastic Surgery

I’d like health care professionals to:
• Treat patients and families with dignity and respect. Dignity and respect are not just words. They are how one feels about people and are part of the cure for any illness.
• Keep families informed.
• Know that our time is valuable as well and that others depend on us.
• Realize that being at the hospital is not the only thing we have to do that day.
• Arrange appointments together when more than one doctor is involved.
• Understand that family members are a very important part of the medical team. If they build trust with the family members, it enhances the patient’s wellness.
• Communicate with patient and family even when they don’t know the answers.
Lois Barcus

Home: (706) 736-1765

Robert Bledsoe

Home: (706) 868-8048
Email: rbledsoe@aug.edu

Personal Story: I have come to see health care as it affects an entire family. My youngest daughter was born at 26 weeks gestation and developed Retinopathy of Prematurity. She receives three to four hours of therapy each week and has received laser surgery and contacts. My wife has accessed oncology and obstetrics services. My mother received hospice care and my father is

Diagnosis:
- Prematurity- 26 weeks gestation (daughter)
- Retinopathy of prematurity (daughter)
- Cancer- (wife survived)
- Uterine Cancer- (mother died)

Areas of Interest:
- Neonatal Intensive Care Unit Experience
- Eye Clinic
- Outpatient surgery

Medical Care/Services:
- Oncology
- Pediatric Ophthalmology
- Labor and delivery
- Hospice
- Neonatal Intensive Care Unit
- Senior/Eldercare

I'd like health care professionals to:
- Treat the family as a living organism.
- Take notes on the entire family. Know them personally.
- Listen longer. Families don’t always start a visit with their real concerns.
- Give information on a parent’s level of understanding.
- Create an environment in which the patient can focus on the meeting with medical professionals and not auxiliary components such as billing, reception, office staff, etc.
- Listen, question, consider, communicate and care.
- Improve communication from specialists back to generalists once an issue has been identified.
- Care for the whole person and the whole family.
Barbara Burk, PA-C, MSCS

Home: (706) 338-1503

Personal Story: I was diagnosed with lymphoma at age five, relapsed at age fourteen, and relapsed at age twenty four. When I was one year old I was diagnosed with Crohns disease. I also have two brothers who also live with Crohns.

Diagnosis:
• Cancer- Lymphoma
• Crohns

Areas of Interest:
• Cancer Research
• Multiple Sclerosis Research
• Crohns Research
• Piano
• Rock Climbing
• Traveling

Medical Care/Services:
• Eagleston Hospital Atlanta GA- Gastrointestinal services, Hematology/Oncology services, Radiology
• MCGHealth- Gastrointestinal services, Hematology/Oncology services, Radiology

I'd like health care professionals to:
• Listen to our individual stories, remember how this affects our whole world and family.
• Listen to our recommendations and keep in mind that if you are living with chronic disease you know your body and your disease better than anyone.
Laura Caruso

Home: (706) 631-0349

Personal Story: My daughter Kelly was diagnosed in 1999 with a brain tumor. After the tumor was removed she developed brain cancer and underwent chemotherapy and radiation. Since then, Kelly has had six surgeries. She had surgeries for her tumor, a hematoma and then an exploratory surgery. After her exploratory surgery she had problems moving her right toes and was in a wheelchair for six months. Her determination and drive got her up and walking and running again! She is now a freshman at Westside High School and is participating in the Special Olympics this year. She loves to cook and read. Kelly makes a new friend everywhere she goes.

Diagnosis:
• Brain Cancer

Areas of Interest:
• Making sure care is as good as when we received it
• Reading

Medical Care/Services:
• Prosthetics
• Scoliosis
• Orthopedic Surgery
• Endocrinology
• Hem/Onc Clinic
• Neurology
• Neurosurgery

I'd like health care professionals to:
• Listen to Mom!
Mike Cliatt

Home: (706) 736-0200

Personal Story: My wife Debbie was an MCG employee for 27 years and a patient at MCGHealth for six and a half years for cardiac related disease. Debbie also endured diabetes for 12 years. She passed on December 9, 2006. I have also been a cardiac patient here when I suffered a heart attack and had two stents installed in May of 2007. I still utilize the cardiac services and am an active participant on many advisory boards.

Diagnosis:
• Diabetes
• Congestive Heart Failure
• Renal Failure
• Cardiac blockage

Areas of Interest:
• Cardiology
• Health Partners
• Physicians Practice Group
• Intensive Care Units

Medical Care/Services:
• Cardiovascular Center
• Family Medicine
• Pain Management Clinic

I’d like health care professionals to:
• Communicate
• Build relationships with the patients
• Answer questions efficiently
• Respect the patient and their loved ones

• Know that a diagnosis not only affects the patient, but the entire family.
Kelley Dube

Home: (706) 855-0238
Email: kld0036@aol.com

Personal Story: I’m married to a wonderful husband, Chris. We have 3 sons – CJ, Matthew, and Timothy. I’m a full-time mom and a part-time pharmacist at Publix pharmacy. Our family has organized a foundation in honor of our son known as “CJ’s Animals.” For the last four years CJ’s Animals has raised thousands of dollars for the American Cancer Society’s “Relay for Life.” Also, in the past years CJ’s Animals has donated red wagons to the MCGHealth Children’s Medical Center for the annual Wagon of Wishes Campaign.

Diagnosis:
• My son was diagnosed with leukemia in Feb 2004 at MCGHealth. He remains in remission and just completed three and a half years of treatment. We are thankful for the great treatment we received during CJ’s initial diagnosis. The care and compassion for CJ is what allowed for the development of CJ’s trust in the doctors and nurses. This is turn has lead to CJ’s success in treatment.

Areas of Interest:
• Sports
• Reading
• “Make-A-Wish” Volunteer
• Awareness to cure kids cancer
• Making a hospital stay fun. Keeping children busy and entertained while waiting for appointments
• Medication errors and reviews
• MCGHealth Children’s Medical Center Family Advisory

Medical Care/Services:
• Hematology/Oncology
• Dermatology
• Orthopedics
• Rehabilitation Services- Physical Therapy
• Endocrinology

I’d like health care professionals to:
• Listen to us
• Respect us
• Have fun
• Smile
Mary Dunn

Home: (706) 793-2539

Personal Story: I am a retired employee of MCG, after 32 years of service. In 1993, while I was a unit clerk, I was diagnosed with breast cancer and it recurred in 2001 again in my right breast. I went through chemo treatment for the cancer and thought that it was the worse thing that could have happened to me in my life. I was glad that something so bad could be so good. Going through chemo introduced me to a wonderful person, who became a very dear best friend.

Diagnosis:
- Breast cancer right breast (1993)
- Recurrent breast cancer in right breast (2001)

Areas of Interest:
- Hematology / Oncology
- Surgical Oncology
- Breast Health
- Cancer Center

Medical Care/Services:
- Cancer Clinic
- Hematology / Oncology

I'd like health care professionals to:
- Be more forth coming in sharing information with patient and families.
Nettie Engels

### Personal Story
My husband and I adopted two siblings at the ages of nine and ten. Both children have multiple mental health issues. My family has had frequent interactions with school personnel, mental health providers, inpatient psychiatric care, police, and the justice system. We have maintained the family unit while struggling to help both girls learn to manage their illnesses.

### Diagnosis:
- Bipolar Disorder
- Attention Deficit Hyperactivity Disorder (ADHD)
- Oppositional Defiance Disorder
- Reactive Attachment Disorder
- Post Traumatic Stress Disorder (PTSD)
- Depression
- Borderline Personality Disorder

### Areas of Interest:
- Coordination of care between services
- Importance of knowing family history
- Communication with care providers
- Advocating for child’s care
- When to seek care
- Adoptive families/adopting older children
- Transitioning from parent of minor child to parent of adult child with mental illness

### Medical Care/Services:
- Counseling – individual, family, couple
- Emergency Care
- Pediatrics
- Gynecology
- Psychiatry – inpatient and outpatient

### I'd like health care professionals to:
- Understand need for family involvement in care of children with mental illness (age-appropriate)
- Help develop treatment environment free of blame for child’s illness and behaviors
- Develop an environment of support
- Be accessible (within reasonable limits)
- Listen (verbal and nonverbal)
- Include families in decisions about care (age-appropriate)
- Clearly share expectations without making promises
- Realize the isolation the family may experience
- Ask how each family member is doing
Herbert and Barbara Hall

Home: (706) 447-4676
Email: mchall004@yahoo.com

Personal Story: Our twins, Jordan and Eboney, have Sickle Cell Anemia. This was our main reason for getting involved. We have received excellent care at MCGHealth. When the kids have been in the hospital due to a pain crisis, a representative has brought books to read or movies for them to watch. Medication and awareness of the disease, along with a great support staff at MCGHealth that is led by Dr. McKie, has helped maintain the disability. We are a busy family from morning until night with activities that include school, work, sports, and relaxing with our Wii system.

<table>
<thead>
<tr>
<th>Diagnosis:</th>

</tr>
</thead>
<tbody>
<tr>
<td>• MCGHealth Children’s Medical Center</td>
<td>• Be aware of the situation and not judge a book by its cover</td>
</tr>
<tr>
<td></td>
<td>• We want them to continue to do what they’re doing and continue looking for a cure for Sickle Cell Anemia</td>
</tr>
<tr>
<td></td>
<td>• Remember that we are coming to them for help in controlling our children’s pain, not to be judged by our race or creed</td>
</tr>
</tbody>
</table>
Personal Story: My son, Stanley, was born at 28 weeks gestation and spent 93 days in the Neonatal Intensive Care Unit. Although he has limitations with physical activities, he is a lovable, bright and sociable child. He receives therapies on a weekly basis and attends regular classes in the Richmond County Schools.

Diagnosis:
- Cerebral Palsy - Spastic Diplegia, Right Hemiparesis
- Seizures
- Attention Deficit-Hyperactivity Disorder (ADHD)

Areas of Interest:
- People-first language
- Advocacy

Medical Care/Services:
- Occupational Therapy
- Physical Therapy
- Allergy
- Developmental specialist
- Pediatric Neurology
- Orthopedics
- Pediatric Dentistry
- Hospitalizations

I'd like health care professionals to:
- Be courteous and attentive
- Be well informed and show concern for the well-being of the patient
- Explain things well
- Be positive in your approach
- Be careful with tone of voice
- Realize families have many other things to deal with besides that particular appointment
- Provide later clinic hours with less waiting time
- Keep in mind the shoes that we walk in and how you would want to be treated if in our situation
- Not have book knowledge alone- remember that each patient is different
- Families know their children best
Mark Hines

Home: (706) 793-1603

Personal Story: Over a two-year period, I went from a normal lifestyle to being totally dependent on others as a result of multiple sclerosis. Now I have turned that experience into a desire to become self-sufficient.

Diagnosis: • Multiple Sclerosis

Areas of Interest: • Providing support and information
• Independent living skills
• Getting to and around the hospital
• Multiple Sclerosis

Medical Care/Services: • Injections
• Daily medications
• Baclofan pump
• Cancer treatments
• Neurologist
• In-home nursing care
• Physical Therapy
• Occupational Therapy

I'd like health care professionals to:
• Recognize the differences between a person who has a disability versus a person who does not
• Acknowledge the patient’s strengths and incorporate them into the treatment plan
**Joey Johnson**

Diagnosis:
- Autism with oral, verbal and motor apraxia
- Craniosynostosis

Areas of Interest:
- Patient and Family Centered Care
- Education in the hospital setting
- Family Advisory Council
- Learning in the Family Environment

Medical Care/Services:
- Dr. Karen Carter - Developmental Pediatrician
- Dr. James Carroll – Neurologist
- Occupational Therapy Clinic
- Inpatient hospital school teacher- 4th floor MCGHealth Children’s Medical Center

I’d like health care professionals to:
- Treat our family with dignity and respect
- Listen to any needs and any concerns we have

Personal Story: I taught for five years at the MCGHealth Children’s Medical Center as an impatient hospital school teacher. I gave birth to twin boys, Noah & Micah at 37 1/2 weeks. Micah was transverse in the womb and born with craniosynostosis. He underwent surgery at eight weeks with Dr. Ann Flannery to correct the condition. Micah was released from Neurology service at two years old. During this time, he reached all developmental milestones, but then symptoms of autism presented themselves. Micah never attained speech. Micah remains non-verbal and receives speech, Occupational Therapy, Physical Therapy, and ABA therapy on a daily basis.
Kay Gillion Martin

Home: (706) 860-7269
Email: kaygmartin@comcast.net

Personal Story: I was diagnosed with stage two breast cancer in February 2006. Today, I am cancer free. I had breast surgery, chemotherapy and radiation treatments. Before I retired in 2003, I was a Physician Recruiter for 20 plus years. I am the proud parent of a Medical College of Georgia School of Medicine Graduate.

Diagnosis:
- Stage two breast cancer
- Areas of Interest
- Cancer Patient Advisor, Family Faculty, Health Partners
- Medical Care/Services
- Oncology, Radiology, Surgery

Areas of Interest:
- Cancer Patient Advisor
- Family Faculty
- Health Partners

Medical Care/Services:
- Oncology
- Radiology
- Surgery

I'd like health care professionals to:
- Communicate with the patient and the patient’s family and friends.
- To be a good listener and discuss the patient’s needs on an extended basis.
- To keep the patient as the focal point of the reason they are practicing medicine.
- To help reinforce that MCGHealth works as a team with the patient and the family. The family can feel left out of the experience and needs to feel as they are a vital team member, since they are the caregivers after the physicians and the staff does their part.
Edyth Martin

Home: (706) 724-4127

Personal Story: I am raising my grandson, Joey, who has multiple medical conditions. He was the victim of family violence while still in his mother’s womb. Joey requires 24/7 care and is fifteen years old. After trying for eight years, I now have nursing help for 10 hours a day. Some days are not as bad as others, but I have to be prepared for the worst at all times. I have had many positive experiences with health care professionals and would like to give back to the hospital that has helped my family so much.

Diagnosis:
• Reactive Airway Disease
• Aspiration Pneumonias
• Seizures
• Cerebral Palsy
• Severe Mental Retardation
• Gastroesophageal Reflux
• Obstructive Hydrocephalus with Ventricular Pulmonary shunt
• Scoliosis
• Precocious Puberty
• Hypothyroidism
• Anasarca
• Allergic Rhinitis

Areas of Interest:
• Caring for special needs patients and reaching out to their family
• Working with medical professionals

Medical Care/Services:
• Physical Therapy
• Neurology
• Pediatrician
• Pediatric Surgery
• Pediatric Orthopaedics
• Pediatric Endocrinology

I’d like health care professionals to:
• Care for the family as well as the patient.
• Help us tap into resources we need.
• Listen to us. Don’t judge us. Most caregivers know more about the child than the professional can see in the first visit.
• Have compassion and respect for patients and their families.
• Include caregivers in all decisions.
Kathryn May

Home: (706) 860-3249
gkmay@bellsouth.net

Personal Story: I encountered ovarian cancer (Stage IIIC) in 2004 and in 2005 I was diagnosed with breast cancer (Stage 1). My ovarian cancer returned in 2007.

Diagnosis:
- Ovarian Cancer
- Breast Cancer

Medical Care/Services:
- Oncology
- Inpatient surgery
- ER

I'd like health care professionals to:
- Be professional and treat me as an individual
- Designate a protocol specifically tailored to my diagnosis and special needs.

Home: (706) 729-0012
mccga909@aol.com

Personal Story: Both of my sons have autism. The youngest also had asthma for 12 years. As a military family, we have had experiences with multiple hospitals. Now settled in Augusta, I have used the TEACH program for behavior modification therapy. As a result of my experiences, I believe you must be willing to get rid of the plans you made for your life in order to move on to the more spectacular one that is waiting for you.

floyd4733@hotmail.com

Personal Story: My wife went into total renal failure in 1978 and spent three months at Walter Reed Army Hospital. She was released to MCGHealth Nephrology.

I joined Family Medicine Clinic upon release from active military service in 1984. I suffer from chronic back pain and am treated by MCGHealth. My family medicine clinic osteopath, Dr. Dahl-Smith, finally gave me relief after she diagnosed the real problem. One of my legs is shorter than the other, due to knee surgery performed over 36 years ago. I had been treated with drugs and bed rest for years prior to coming to MCGHealth.

Medical Care/Services:
• Family Medicine

I’d like health care professionals to:
• Ensure that the patient understands what is happening to them.
• Treat patients as you would like to be treated.
Jean Parker

Home: (706) 738-4261

Personal Story: I was diagnosed with cancer in 1990 as a result of radiation treatments for ringworm as a child. I also was diagnosed with Parkinson’s Disease as a reaction from a medication I was given.

Diagnosis:
• Basil Cell Cancer
• Coronary Artery Disease
• Diabetes
• Chronic Pain Syndrome
• Parkinson’s
• Glaucoma
• Diabetic Retinopathy
• Arthritis
• Neurogenic Bladder
• Diabetic Neuropathy

Areas of Interest:
• Cancer Center
• Neurology
• Cardiology
• Outpatient Surgery
• Intensive Care Units
• Perioperative Services
• Any place where I can be of help

Medical Care/Services:
• Dermatology
• Neuroscience
• Cardiology/ Pacemaker Clinic
• Eye Clinic
• Orthopedics
• Family Medicine
• Vascular Surgery
• Ear, Nose, and Throat (ENT)
• Gastroenterology
• Senior Health

I’d like health care professionals to:
• Listen to concerns and problems
• Be patient with senior citizens’ services
• Be aware of outpatient sources that are available for patients in the community
• Take time to understand patients’ feelings
Alice Reese

Home: (706) 733-0421
alicereese@msn.com

Personal Story: Fifteen years ago, I was diagnosed with Stage 4 breast cancer. After chemotherapy and many other areas of radiology through MCGHealth and a successful autologous bone marrow transplant, I am cancer free. I have had two mastectomies. I am a co-founder of the MCGHealth Breast Cancer Support Group and helped to design the Breast Health Center and another area of Radiology. Before retirement in 2000, I was co-manager of the Institute of Molecular Medicine and Genetics.

Diagnosis:
- 15 year breast cancer survivor- Stage 4, bone metastasis
- Hypothyroidism
- Gastroesophageal Reflux Disease

Areas of Interest:
- Cancer Treatment
- Women’s Health
- Medical Education

Medical Care/Services:
- Radiation Therapy
- Chemotherapy
- Bone marrow/stem cell transplant
- Cancer Center
- Primary Care
- Gastroenterology
- Radiology
- Eye Care

I’d like health care professionals to:
- Treat the patient and family as part of the health care team, not focus on just the disease.
- Listen carefully to the patient
- Explain things as the patient understands
- Be compassionate.
Diagnosis:
- Persistent Pulmonary Hypertension and pneumothorax s/p ECMO
- Tonsillectomy
- Knee surgery
- Hernia surgery
- Fibrocystic breast disease

Areas of Interest:
- NICU
- Medical safety
- Patient and Family Centered Care
- Hospital redesign
- Children’s Heart Program
- ECMO

Medical Care/Services:
- NICU
- Neonatal Follow up Clinic
- Labor and delivery
- Post partum
- OB GYN clinic
- Pediatric Surgery
- Dermatology
- Radiology
- ENT
- Orthopedics
- Physical Therapy

I'd like health care professionals to:
- Be more familiar with family centered care
- Have shorter waiting periods in clinics
- Have areas that are designed keeping the needs of challenged children in mind.

Personal Story: I am a neonatal nurse with 27 years of experience. I work at MCGHealth Children’s Medical Center NICU as a Transport ECMO Specialist. In my role, I am responsible for the stabilization of sick infants within all areas of our facility. As an ECMO Specialist, I am responsible for managing neonatal and pediatric patients on heart lung bypass or extracorporeal membranous oxygentation (ECMO). I am the PICC (peripherally inserted central catheter) Trainer for MCG.

I have used a number of MCG services for my own care. ENT performed a tonsillectomy. GI surgery performed a femoral hernia repair. Orthopedics performed knee surgery for torn ligaments. I have my routine female care at the Gyn Clinic. All of these services have provided outstanding care. Most importantly, I am the grandmother of four children. Three of my grandchildren were taken care of in MCGHealth’s neonatal intensive care unit.

Deborah A. Wall

Email: debbwall@comcast.net
Diagnosis:
- *My Spouse*: Diabetes; post-traumatic stress disorder; pancreatitis; bi-polar; gastroparesis
- *Myself*: Adult Attention Deficit Disorder

Areas of Interest:
- Behavioral Health
- Medical Intensive Care Unit

Medical Care/Services:
- Behavioral Health
- Emergency Department
- Family Medicine Clinic

I’d like health care professionals to:
- “Play the ball where it lies.” Said another way, treat us where we present for care.
- Listen actively. If providers can’t fulfill a request, address the issue right then.
- When bad news is followed by a cold, scientific explanation, it is never taken well.
- Call us by our first names. It may sound strange to us at first, but we’ll warm up to it quickly.
- Never forget that patients see and hear everything.
Sylvie June Whittaker

Home: (706) 863-2845

Personal Story: My experiences have been through my husband John, and his admissions to the emergency room and the floor units. John has Alzheimer’s and is a patient at the Georgia War Veterans Home. He is retired from the United States Navy, after 30 years, and the Columbia County Board of Education, where he taught history.
